LIPA Board of Trustees

Re: Quarterly Report on Interest Rate Exchange Agreements
Quarter Ended March 31, 2016

Dear Finance & Audit Committee Members:

The Long Island Power Authority (“the Authority”, “LIPA”) is filing this report pursuant to reporting requirements outlined in the Guidelines for the Use of Interest Rate Exchange Agreements, as approved by the Board of Trustees on March 26, 2015.

Description of the Interest Rate Exchange Agreements

LIPA entered into a separate ISDA Master Agreement and Schedule to the Master Agreement (collectively, a “Master Agreement”) with each of the bank counterparties (each individually, a “Counterparty” and collectively, the “Counterparties”) listed in the table below. Each Master Agreement, together with the related confirmation or confirmations, is hereinafter referred to as an “Interest Rate Exchange Agreement”, “IREA” or “Swap”. Details of each IREA are included in the Summary, attached hereto as Appendix A. The notional amounts of each transaction are set forth below:

	Counterparty	Notional Amount (000s)	Effective Date	Termination Date	Type of Swap
1	Wells Fargo Bank, N.A. (WFB)	\$150,000	Terminated		
2	Societe Generale, New York Branch (SG)	\$100,000	Terminated		
3	UBS AG (UBS)	\$587,225	6/1/2003	12/1/2029	Floating-to-Fixed
4	Merrill Lynch Capital Services, Inc. (MLCS)	\$502,090	7/1/2004	8/15/2033	Basis Swap
5	Bear Stearns Capital Markets, Inc. (BSCM)	\$251,045	7/1/2004	8/15/2033	Basis Swap
6	Citibank, N.A., New York (CB)	\$251,045	7/1/2004	8/15/2033	Basis Swap
7	Morgan Stanley Capital Services LLC (MSCS)	\$110,715	Matured		
8	Wells Fargo Bank, N.A. (WFB)	\$200,000	6/29/2015	6/29/2020	Total Return ¹

The estimated total Mark-To-Market value of the transactions, as of March 31, 2016, is approximately negative \$286 million. The mark-to-market value excludes transaction costs and is calculated at prevailing mid-market rates. Therefore, it represents the hypothetical amount that LIPA would owe to the Counterparties if the transactions were terminated on that date absent transaction costs.

¹Based on the Authority’s Series 2015A Bonds (MMD FRN Rate), initially purchased by Wells Fargo pursuant to an Agreement Relating to Bonds between the Authority and Wells Fargo.

Ratings of Counterparties

Please note that ratings below are as of March 31, 2016

Bank Counterparty	Moody's	S&P	Fitch
UBS AG, Stamford Branch	A1	A	A
Merrill Lynch Capital Services, Inc. ¹	Baa1	BBB+	A
Bear Stearns Capital Markets Inc. ²	A3	A-	A+
Citibank, N.A., New York	A1	A	A+
Wells Fargo Bank, N.A.	Aa2	AA-	AA

¹Ratings reflect the ratings of Bank of America Corp.

²Ratings reflect the ratings of its parent company, JP Morgan Chase & Co.

Merrill Lynch Capital Services, Inc., which carries the ratings of its parent and the guarantor of the swap, Bank of America Corporation, is rated Baa1 by Moody's and BBB+ by S&P and no longer meets the requirements under the terms of the ISDA. Please see further discussion of Merrill Lynch under "Counterparty Risk" below. All of LIPA's other counterparties' ratings continue to be above the ratings required by the swap agreements.

Description of Counterparties

UBS AG is a Swiss bank with ratings of A1/A/A. As of October 1, 2013, Bank of America completed the merger of its Merrill Lynch & Co., Inc. subsidiary into Bank of America Corporation ("BAC"). In connection with this merger, Bank of America Corp. assumed all of Merrill Lynch & Co., Inc.'s obligations including those of its subsidiaries. Merrill Lynch Capital Services, Inc. ("MLCS") is a Delaware corporation and was a subsidiary of Merrill Lynch & Co., Inc. Therefore, Bank of America Corp. is the guarantor on the swap with MLCS, and is rated Baa1/BBB+/A. Bear Stearns Capital Markets, Inc. ("BSCM") is a subsidiary of The Bear Stearns Companies, Inc. ("TBSCF"), which on May 30, 2008 was acquired by JP Morgan Chase & Co. (JPMC & Co.), a Delaware Corporation rated A3/A-/A+. All payments payable by BSCM are guaranteed by JPMC & Co. following the acquisition. The ratings of BSCM, therefore, reflect those of JPMC & Co. Citibank, N.A., New York, a National Banking Association, is rated A1/A/A+. Wells Fargo Bank, N.A., a National Banking Association, is rated Aa2/AA-/AA.

Risk Assessment

Counterparty Risk: This is the risk that a Counterparty (or its guarantor) will default under its agreement. If a counterparty were to default under its agreement when owing a termination payment to LIPA, LIPA may have to pay another entity to assume the position of the defaulting counterparty. Currently, Counterparty Risk for LIPA is limited given that the majority of the termination values of the transactions are negative to LIPA (as of March 31, 2016, only Swap 8 had a positive value to LIPA).

LIPA sought to limit counterparty risk in these transactions by contracting with highly rated counterparties (see “Description of Counterparties” above) or requiring guarantees of the counterparty’s obligations under the IREA. LIPA monitors the credit rating and overall financial condition of the Counterparties (or their guarantors) and may exercise its right to assign the agreement to another counterparty, if necessary, to mitigate counterparty risk. LIPA also has the express written option, upon certain specified notice, to optionally terminate Swaps 4 through 6 at any time at market, and Swap 8 at any time on or after June 29, 2016. These cancellation options afford LIPA the opportunity to limit risks from dealing with a Counterparty whose financial position is deteriorating. The unilateral option to terminate is not provided in Swap 3 (UBS); however, Counterparty Risk on this swap is limited as the mark-to-market is negative. Moreover, LIPA has included additional termination provisions in all of its swaps as well as certain collateral posting arrangements, which limit exposure to lower-rated counterparties should the mark-to-market of the swaps become positive.

With respect to Swap 4, downgrades of Bank of America Corp. (guarantor of Merrill Lynch) below the A3/A- level have triggered an “Additional Termination Event” under the terms of the agreement (Bank of America was rated Baa1 by Moody’s and BBB+ by S&P as of March 31, 2016). The Authority has the ability to terminate the swap based on these ratings; however, at this time, the current mark-to-market is negative to the Authority and therefore, the Authority would be required to make a payment to Merrill Lynch to terminate the swap. Accordingly, the Authority continues to monitor options with respect to this swap. Merrill Lynch continues to perform as a responsible counterparty, and the Authority continues to reserve its rights under the agreement with respect to the Additional Termination Event.

Termination Risk: Another risk associated with these transactions is the possibility that an agreement could be terminated by a Counterparty with LIPA owing a termination payment to the Counterparty. Only LIPA is entitled to terminate these transactions from time-to-time without cause. As long as LIPA fulfills its obligations under the contracts and does not default under the agreements, the Counterparties do not have the right to terminate these agreements. LIPA believes that termination risk is low because the Counterparties may terminate only upon the occurrence of certain events such as payment defaults, other defaults which remain uncured for 30 days after notice, the bankruptcy or insolvency of LIPA (or similar events), certain downgrades of LIPA’s and its insurer’s, if any, credit rating, or in the case of Swap 8, certain events related specifically to the associated bonds. LIPA’s credit rating as of March 31, 2016 was Baa1/A-/A-, with stable outlooks. LIPA’s insurer on Swaps 3 and 4, Assured Guaranty Municipal Corp. (“AGM”), formerly Financial Security Assurance (“FSA”), was rated A2/AA by Moody’s and S&P as of March 31, 2016. Fitch has, at AGM’s

request, withdrawn its rating. Moody's has a "Stable Outlook" for AGM, and S&P has a "Stable Outlook".

With respect to Swap 3, an early termination event may occur should the claims-paying ability of AGM be rated below both A2 by Moody's and A by S&P, and LIPA has not: (a) provided a replacement credit enhancement, (b) maintained a credit rating of at least either A3 by Moody's or A- by S&P, or (c) negotiated a Credit Support Annex with UBS and provided collateral as required thereunder. Under such an event, the counterparty would have a right to terminate the transaction and LIPA may be required to make up to five annual payments of up to \$35 million for the first four years with the remaining balance due on the fifth year arising from such termination, depending on the market at that time. Additionally, should LIPA redeem any of the underlying bonds and not reassign the swap to other outstanding variable rate debt, the swap would terminate proportionately and be subject to the same deferred payment provisions identified above.

With respect to Swap 4, an early termination event may occur should LIPA be downgraded below either Baa3 by Moody's or BBB- by S&P, or the claims-paying ability of AGM be rated below either A3 by Moody's or A- by S&P and LIPA has not: a) provided replacement credit enhancement (including compliance with collateral posting provisions, which require the posting of the negative mark-to-market in excess of a \$30 million threshold if LIPA's lowest rating from any one of Moody's, S&P or Fitch falls to the Baa3/BBB-/BBB-level, as more fully described in "Collateral Posting" below), or b) provided a substitute swap insurance policy reasonably acceptable to MLCS. Under such an event, the counterparty would have a right to terminate the transaction and LIPA may be required to make a termination payment from such termination, depending on the market at that time.

With respect to Swap 5, an early termination event may occur should LIPA be downgraded below either Baa3 by Moody's or BBB- by S&P.

With respect to Swap 6, an early termination event may occur should LIPA be downgraded by any one of Moody's, S&P or Fitch below Baa3/BBB-/BBB-, or if LIPA is downgraded by any one of Moody's, S&P or Fitch below Baa2/BBB/BBB and within 20 days of receiving notice of such downgrade from the counterparty has not (a) provided a guarantee, letter of credit, surety bond, insurance policy or other credit support document, (b) transferred the Swap to an acceptable counterparty, or (c) executed a credit support annex.

With respect to Swap 8 (Total Return Swap), an early termination event may occur should the rating on the associated bonds (the Authority's Series 2015A Bonds - MMD FRN Rate) be downgraded by any one of Moody's, S&P or Fitch below Baa3/BBB-/BBB-. Unlike Swaps 3-6, the counterparty also has the right to terminate following certain other events related specifically to the associated bonds, such as: if LIPA fails to pay principal or interest on the underlying bonds; if interest on the bonds is no longer deemed tax-exempt; if the bonds are found to be invalid, illegal or unenforceable; or if an event of default occurs under the purchase agreement for the bonds. If a termination event were to occur with respect to LIPA, the counterparty would have a right to terminate the transaction and LIPA would make or receive any payment arising from such termination, depending on the change in market value

of the associated bonds. These termination events are similar to the termination events under LIPA's letter of credit and other bank agreements.

Additionally, under the structure of Swap 8, upon the swap's maturity, a termination amount will be payable by either LIPA or the counterparty based on the market value of the associated bonds. The bonds are callable at par at the scheduled termination of the swap, and if called, would not result in a termination amount payable by either party.

Collateral Posting: Under some of the swap agreements, LIPA may be required to post collateral to its counterparties in the event the mark-to-market is negative and its ratings fall below certain levels.

Under Swap 4, if LIPA's lowest rating from any one of Moody's, S&P or Fitch falls to the Baa3/BBB-/BBB- level it must post the negative mark-to-market in excess of a \$30 million threshold. A further downgrade from any one of Moody's, S&P or Fitch below the Baa3/BBB-/BBB- level would require LIPA to fully collateralize the mark-to-market in the event the counterparty does not exercise its termination rights under the agreement.

Under Swap 5, LIPA must fully collateralize the mark-to-market if its lowest rating from either Moody's or S&P falls to the Baa3/BBB- level.

As of March 31, 2016, LIPA would be required to post a total of \$4.4 million in collateral upon a downgrade by Moody's, S&P, or Fitch to the Baa3/BBB-/BBB- level. Collateral may be posted in the form of cash or eligible securities.

There are currently no collateral posting requirements with respect to Swaps 3 and 6; however, LIPA may be required to execute documentation containing such provisions and post additional collateral upon the occurrence of certain events, as described further in "Termination Risk" above.

Swap 8 is not subject to any collateral posting by LIPA.

Basis Risk: The variable interest rate (69.47% of 1-month LIBOR) LIPA receives under Swap 3 may differ from the amount LIPA is required to pay on the associated variable rate bonds, potentially resulting in net increased payments by LIPA. This is referred to as "Basis Risk." LIPA's variable rate bonds have traded, from time to time, at yields above the variable rates received under Swap 3. LIPA has attempted to mitigate this risk by more closely matching the variable rate payable on its bonds to that received under Swap 3. Specifically, in December 2014, LIPA refunded \$150 million of outstanding variable rate bonds with Floating Rate Notes (FRNs) that bear interest at 70% of LIBOR, plus a fixed spread. Additionally, LIPA refunded \$200 million of outstanding variable rate bonds in June 2015 with MMD FRN bonds. The interest rate payable on these MMD FRN bonds, taking into account payments made and received under Swap 8 (69.4% of LIBOR plus a fixed spread), is closely associated with the floating rate received under Swap 3. In November 2015, LIPA refunded \$149,000,000 of outstanding variable rate bonds with FRNs that bear interest at 70% of LIBOR, plus a fixed spread.

In addition, LIPA has three basis swaps (Swaps 4, 5 and 6) whereby LIPA pays SIFMA and receives 70.5% of 1-Month LIBOR. LIPA also received an upfront amount of \$35 million at the inception of the basis swaps, representing a reduction or savings in interest expense on the associated debt. Between 2008 and 2011, as a result of dislocation of the short-term interest rates, the short-term SIFMA/LIBOR ratio increased compared to the historical averages. This is a form of Basis Risk that resulted in the erosion of savings on these swaps, as the SIFMA rate paid by LIPA exceeded the percentage of LIBOR rate received by LIPA from time to time. From late 2011 to March 2016, the short-term SIFMA/LIBOR ratio decreased to below historical averages, resulting in LIPA receiving positive annualized accruals. As of March 31, 2016, the short-term SIFMA/1-Month LIBOR ratio applicable to these swaps was 92.2%.

The Authority views Basis Risk as a limited form of variable rate exposure, and therefore takes Basis Risk into account when analyzing outstanding interest rate exposure, as shown in Appendix C.

Interest Rate Exposure

As of March 31, 2016, LIPA's net floating rate exposure is 6.70% as summarized in Appendix C.

Status of Qualified Independent Representative ("QIR")

The Authority has reviewed and approved the use of QIRs meeting the standards established under the Dodd-Frank Act and contained at present in rulemaking by the Commodity Futures Trading Commission. The Authority's QIRs have previously represented that they meet all applicable standards and as of the date hereof, the Authority is not aware of any material changes to the status of such representations.

APPENDIX B

Additional Termination Events – Collateral Posting Thresholds

Under the respective Master Agreements, LIPA or its counterparty must post collateral in the event of certain downgrades, as described below:

Transaction	Counterparty	Relating to Counterparty Downgrade	Relating to LIPA Downgrade
1.	Terminated December 10, 2013		
2.	Terminated December 10, 2013		
3.	UBS AG (UBS)	No current collateral posting provisions. LIPA has the right to terminate the swap if UBS fails to maintain rating of A3 (Moody's) or A- (S&P) and fails to execute a Credit Support Annex (or CSA) with LIPA	No current collateral posting provisions. UBS has the right to terminate the swap if: 1 - Swap Insurer (AGM) fails to meet its payment obligations and such failure is continuing pursuant to the Swap Insurance Policy 2 - Insurer ratings fall below A2 (Moody's) and A (S&P) and an event of default has occurred with LIPA as the defaulting party 3 - All the Swap Insurer ratings fall below A2 (Moody's) and A (S&P) and LIPA has not: i) provided a replacement credit enhancement ii) maintained a credit rating of at least A3 (Moody's) or A- (S&P) iii) negotiated a Credit Support Annex with UBS and provided collateral as required thereunder
4.	Merrill Lynch Capital Services, Inc. (MLCS)	Rating of BAC (Guarantor of MLCS) falls below A3 (Moody's), A- (S&P), or A- (Fitch), as set out in CSA. In the event BAC falls below A3 (Moody's) or A- (S&P), LIPA has the right to terminate the swap.	Rating of LIPA falls below Baa2 (Moody's), BBB (S&P), or BBB (Fitch) (\$30 million threshold) or below Baa3 (Moody's), BBB- (S&P), or BBB- (Fitch) (\$0 threshold), as set out in CSA (Swap Insurer (AGM) provisions and/or ratings do not affect collateral posting requirements by LIPA). In the event LIPA falls below Baa3 (Moody's) or BBB- (S&P), or in the event AGM falls below A3 (Moody's) or A- (S&P) and LIPA does not provide a substitute insurance policy or credit enhancement/collateral (see "Collateral Posting" above), MLCS has the right to terminate the swap.
5.	Bear Stearns Capital Markets Inc. (BSCM)	Rating of JPMC & Co. (Guarantor of BSCM) falls below A3 (Moody's) or A- (S&P). In the event JPMC & Co. falls below Baa3 (Moody's) or BBB- (S&P), LIPA has the right terminate the swap.	Rating of LIPA falls below Baa2 (Moody's) or BBB (S&P). In the event LIPA falls below Baa3 (Moody's) or BBB- (S&P), BSCM has the right to terminate the swap.

Transaction	Counterparty	Relating to Counterparty Downgrade	Relating to LIPA Downgrade
6.	Citibank, N.A., New York (CB)	No current collateral posting provisions. LIPA has the right to terminate the swap if rating of CB falls below Baa3 (Moody's), BBB- (S&P), or BBB- (Fitch); or if rating of CB falls below A3 (Moody's), A- (S&P), or A- (Fitch) and CB has not provided a guarantee, letter of credit, surety bond, insurance policy or other credit support document, or Citibank has not executed a Credit Support Annex to be negotiated with LIPA	No current collateral provisions. CB has the right to terminate the swap if: 1 - Rating of LIPA falls below Baa3 (Moody's), BBB- (S&P), or BBB- (Fitch) 2 - Rating of LIPA falls below Baa2 (Moody's), BBB (S&P), or BBB (Fitch) and LIPA has not provided a guarantee, letter of credit, surety bond, insurance policy or other credit support document, or LIPA has not executed a Credit Support Annex to be negotiated with Citibank
7.	Matured September 1, 2015		
8.	Wells Fargo Bank, N.A. (WFB)	Rating of WFB falls below A3 (Moody's), A- (S&P), or A- (Fitch) by two rating agencies. In the event WFB falls below A3 (Moody's), A- (S&P), and A- (Fitch) by all three agencies, LIPA has the right to terminate the swap.	LIPA does not post collateral under Swap 8. If the rating of the associated bonds (Series 2015A - MMD FRN Rate) falls below Baa3 (Moody's), BBB- (S&P), or BBB- (S&P), WFB has the right to terminate the swap.

Basis Swap (Floating) (related to Swaps 4, 5 and 6) (3)	\$577,403,500
Total Net Floating Rate Exposure of Swaps	\$43,261,293
Cash & Short-Term Investments Net of Restricted Funds (5)	(\$581,928,621)
NET FLOATING RATE BONDS (b)	\$515,332,672
Net Floating Rate Exposure (b) / (a)	6.70%

- 1) The 2015A Bonds have an associated Total Return Swap whereby LIPA receives the rate paid on the Bonds (MMD Index plus a spread) and pays a rate of 69.4% 1-Month LIBOR plus a spread.
- 2) Swap 3 treated as having floating rate exposure equal to the highest ever annual average for the SIFMA/LIBOR ratio of 128% minus the receiver ratio of 69.47% on an amount net of the LIBOR-based bonds (2014C, 2015A, and 2015C), and also taking into account the net differential on the LIBOR-based bonds.
- 3) Basis Swap treated as having floating rate exposure equal to the highest ever one year average of the SIFMA/LIBOR ratio of 128% minus the receiver ratio of 70.5%.
- 4) Swaps numbered as shown on page 1.
