REAP

What is REAP?

REAP is a LIPA program for income-eligible customers designed to help them save energy and lower their electric bills. Participation in REAP can make your home healthier and safer. In addition, participants are guided to other non-LIPA services that can help them with any special needs.

Free Energy Audit & Efficiency Measures

A REAP technician will come to your home and provide a FREE ENERGY AUDIT and teach you how to use less electric energy by practicing energy efficiency. As part of an energy audit, a REAP technician will inspect your:

- electric appliances
- lighting
- heating system, and
- other electric energy consuming equipment to determine just how energy-efficient they are.

They'll talk to you about your lifestyle and give you valuable information about energy-efficiency and provide practical suggestions, like lowering the temperature on your thermostat and using energy-saving settings on appliances, to help lower your energy costs. They'll evaluate all the information they gather to help determine how much money you could save on your energy bills.

You are Eligible for REAP if:

- ✓ You have a LIPA account number*
- ✓ Your house is a one to four family dwelling
- ✓ You meet the income guidelines

Energy Efficiency = Energy Savings

One of the easiest ways to save energy is to increase the energy-efficiency of your home. During the energy audit, a REAP technician may install energy-saving measures in your home...at no cost to you! In fact, all REAP services provided are at no cost to eligible customers. The energy saving measures we choose will depend on individual needs and circumstances; but REAP technicians choose items that will make your home the MOST energy efficient.

We *MAY* install:

- High-efficiency compact fluorescent bulbs
- Energy-efficient refrigerators**
- Electric water heater insulating jackets
- Energy-efficient water flow devices

Customers who have electric heat or central air conditioning *MAY* also get:

- Air conditioning filter replacements
- Air sealing and duct sealing
- Duct insulation

**Eligibility for refrigerator replacement is determined on energy usage of the appliance and is not dependant on age/model/or make of the unit. Please refer to our Web site for further information or call 1-800-263-6786.

To Learn More About REAP

Call us, toll-free, at **1-800-263-6786** or complete and mail the attached, postage-paid card. You can also email us at reap.lipa@honeywell.com. A REAP team member will contact you to schedule an energy audit and answer any questions you may have about REAP.

Tienes dificultad en manejando sus cuentas? Nuestro Programa de Accesibilidad Financiera de Energía Residencial (REAP) puede ser la respuesta. El programa REAP ayuda casas elegibles manejar sus cuentas eléctricas a través de la educación y de la instalación posible de dispositivos que ahorra energía sin coste a usted.
