I guess we were just lucky and did not loose power long at all during Isaias.

My view what should be done follows:

I can not see how any other entity could do better unless they can guarantee that they are more capable and prove they have the equipment and employees to cope wit storms like Isaias. The season could have some challenging storms. I vote to leave [PSEG.LI](#) in tact and keep pushing to make them better as we experience unpredictable mother nature.
